BIOACTIVE PRECISION PEPTIDES™
HIBISCUS

/ Your Daily SPA Method

PRECISION SKINCARE SUPPORT

renewed was created to support your skin's natural renewal process with a daily drink that feels elevated, simple, and repeatable. Just mix, sip, and make it part of your morning ritual. Dual-action Bioactive Peptides, featuring hibiscus, provide a unique peptide fingerprint — targeting skin renewal. The hibiscus you taste is actually doing the work. Combined with powerful ingredients to provide full-body skin support that signals, preserves and amplifies. This is your daily SPA method.

WHY YOUR SKIN NEEDS MORE THAN
COLLAGEN

Your skin is living tissue. It is constantly communicating, rebuilding, hydrating, protecting, and remodeling itself. As we age, the natural balance between collagen renewal and collagen breakdown can shift, which may lead to skin that looks less firm, less hydrated, less smooth, and less resilient. Powered by DermaSignal Matrix™, **renewed** helps support the full renewal story — not just adding building blocks, but helping support the signals, protection, hydration, and nutrients your skin needs to look renewed over time.

THE SPA METHOD™

SIGNAL · PRESERVE · AMPLIFY

S

SIGNAL

The Signal step is powered by a dual-peptide system designed to help support the body's natural collagen-signaling process. Think of ordinary collagen as giving your body “bricks.” Bioactive peptides act more like a message to the crew — helping support the communication pathways involved in collagen renewal, firmness, elasticity, and visible skin vitality.

WHY YOU NEED IT: YOUR SKIN DOES NOT JUST NEED MATERIALS. IT NEEDS COMMUNICATION — PEPTIDES HELP SUPPORT THE SIGNALS THAT TELL SKIN TO KEEP RENEWING.

P

PRESERVE

The Preserve step helps support balance. Skin naturally breaks down and rebuilds collagen every day, and when breakdown outpaces renewal, skin can start to look thinner, duller, and less firm. Pomegranate extract helps support a healthier balance between collagen breakdown and buildup — helping protect what you build.

WHY YOU NEED IT: BUILDING COLLAGEN IS ONLY PART OF THE STORY. YOU ALSO WANT TO HELP PRESERVE THE STRUCTURE YOUR SKIN IS WORKING TO MAINTAIN.

A

AMPLIFY

The Amplify step provides the support system your skin needs to look hydrated, smooth, and resilient. Hyaluronic acid supports deep hydration and visible bounce; glycine, proline, lysine, and L-glutamine supply collagen-relevant amino acids; vitamin C supports normal collagen formation; and zinc, copper, and selenium support skin maintenance and antioxidant defenses.

WHY YOU NEED IT: YOUR SKIN NEEDS HYDRATION, STRUCTURE, AND NUTRIENT SUPPORT TO COMPLETE THE RENEWAL PROCESS — FROM WITHIN.

Ingredient Blend Breakdown /

DUAL BIOACTIVE PEPTIDE BLEND

Two clinically studied natural bioactive collagen peptides — the core of DermaSignal Matrix™ — designed to help support the body's natural collagen-signaling process. This is what makes renewed different from a basic collagen powder: precision peptide communication, not just bulk protein.

POMEGRANATE EXTRACT

Pomegranate extract provides bioactive phytochemicals that help protect against collagen breakdown — supporting what you build. A smarter approach to beauty from within, supporting both renewal and preservation at the same time.

NATURAL HIBISCUS PEPTIDE COMPLEX

A delicious hibiscus-berry flavor with a hint of tartness — and a functional one. The hibiscus you taste is actually doing the work, contributing its own peptide complex to the DermaSignal Matrix™ fingerprint targeting skin renewal.

HYALURONIC ACID, AMINO ACIDS + MINERALS

Hyaluronic acid supports hydration and visible plumpness; glycine, proline, lysine, and L-glutamine provide key building blocks involved in collagen structure; and vitamin C, zinc, copper, and selenium help support normal collagen formation, connective tissue integrity, and antioxidant defense.

Skin Benefits

- SKIN FIRMNESS AND ELASTICITY
- DERMAL HYDRATION AND SMOOTHNESS
- FIBROBLAST RESPONSIVENESS
- HEALTHY COLLAGEN AND ELASTIN PRODUCTION
- SKIN RESILIENCE AND VISIBLE RENEWAL
- WHOLE-BODY SKIN SUPPORT, NOT JUST FACIAL SKINCARE
- A SIMPLE DAILY RITUAL THAT FITS INTO YOUR ROUTINE

How It Works Differently

Ordinary collagen products focus on adding more material. **renewed** is a dual-peptide collagen renewal system designed for renewal at the cellular level — amplifying your own collagen and elastin activity and rebuilding healthy-looking skin architecture at the source. It helps support skin in three ways:

Signal

Dual bioactive peptides help support the body's natural collagen-signaling process.

Preserve

Pomegranate helps support what you build by helping protect against collagen breakdown.

Amplify

Hyaluronic acid, amino acids, vitamin C, and minerals support hydration, glow, and the full beauty-from-within experience.

This is not just collagen. This is a daily SPA method for skin that looks renewed, hydrated, firmer, smoother, and more resilient over time.

[HOW TO USE]

Adults mix one packet with 8–10 ounces of water daily. Sip it as part of your morning beauty ritual, afternoon reset, or daily self-care routine. Use consistently for best results.
