POLYPEPTIDE STEM CELL EMULSION

/ Help tired, stressed, and aging skin look visibly smoother, firmer, more radiant, and revitalized.

PRECISION SKINCARE SUPPORT

replenished Polypeptide Stem Cell Emulsion is a skincare formula designed to help tired, stressed, and aging skin look visibly smoother, firmer, more radiant, and revitalized. Powered by plant-based stem cell technology and natural peptides, this restorative formula helps soften the visible signs of skin fatigue often linked to senescence “zombie cells,” while replenishing hydration and supporting a stronger-looking skin barrier. Precision skincare support that signals, preserves and amplifies. This is your daily SPA method.

BEAUTY IS MORE THAN WHAT’S ON THE SURFACE

It goes deeper. Precision skin begins with how skin cells signal, build, and preserve themselves. Every cell remembers its potential — Bioactive Precision Peptides™ help remind it. Precision Skincare by MAKE was created for skin that is not simply aging on the surface, but changing in how it signals, builds, and protects itself. Rather than temporarily targeting the visible signs of aging, the system is designed to support the foundational processes that help skin look firmer, smoother, hydrated, and more resilient over time.

THE SPA METHOD™

SIGNAL · PRESERVE · AMPLIFY

S

SIGNAL

The Signal step is powered by natural bioactive peptides and plant stem-cell technologies — including clinically studied pea and teff peptides with argan stem cells. Together they help soften the visible signs of skin fatigue often linked to senescence “zombie cells,” promoting smoother, firmer, more radiant-looking skin over time.

WHY YOU NEED IT: ZOMBIE CELLS RELEASE STRESS SIGNALS THAT MAKE SKIN LOOK OLDER, FASTER. SIGNALING HELPS REMIND SKIN HOW TO RENEW.

P

PRESERVE

The Preserve step helps support balance and defense. Antioxidants from green tea, pomegranate, and hibiscus — together with a triple ceramide complex — help improve barrier function, elasticity, and visible resilience while protecting the structure your skin is working to maintain.

WHY YOU NEED IT: RENEWAL IS ONLY PART OF THE STORY. A STRONGER-LOOKING BARRIER HELPS PRESERVE EVERYTHING YOUR SKIN REBUILDS.

A

AMPLIFY

The Amplify step delivers the support system tired skin needs to look visibly smoother, firmer, more radiant, and revitalized. Stem-cell support, a multi-level hyaluronic hydration network, and a lipid barrier of squalane and ceramides work together to replenish hydration and promote smoother, firmer, more radiant-looking skin.

WHY YOU NEED IT: SKIN NEEDS HYDRATION, STRUCTURE, AND LIPID SUPPORT TO COMPLETE THE RENEWAL PROCESS — VISIBLY.

DEPTH

Ingredient Blend Breakdown /

PEA & TEFF PEPTIDES + ARGAN STEM CELLS

Clinically studied pea peptide helps improve the look of dark spots, hyperpigmentation, and rough texture for a more uniform complexion, while teff peptide helps skin appear more toned and elastic. Argan tree stem-cell technology supports the appearance of visibly rejuvenated, firmer, denser-looking skin.

ALPINE ROSE, APPLE & GRAPE STEM CELLS

A senolytic botanical blend — alpine rose extract with apple and grape stem-cell extracts — helps address senescent “zombie cells” that release stress signals and accelerate the visible signs of aging, improving the appearance of skin density and refining the skin barrier.

GREEN TEA, POMEGRANATE & HIBISCUS

A botanical antioxidant trio that helps protect skin from oxidants and reduce the visible effects of oxidative stress — supporting overall skin vitality and the look of stronger, more resilient skin.

CERAMIDES, SQUALANE + HYALURONIC ACID

A triple ceramide complex (NP, AP, EOP) with squalane, bakuchiol, niacinamide, and multi-weight hyaluronic acid replenishes hydration, supports a stronger-looking lipid barrier, and helps improve the appearance of texture, elasticity, and visible resilience.

Skin Benefits

- PROMOTES VISIBLE SKIN RENEWAL FOR A MORE REVITALIZED, YOUTHFUL APPEARANCE
- VISIBLY REDUCES THE APPEARANCE OF DARK SPOTS AND HYPERPIGMENTATION FOR A BRIGHTER, MORE EVEN-LOOKING COMPLEXION
- HELPS IMPROVE THE APPEARANCE OF SKIN'S STRUCTURAL FOUNDATION FOR VISIBLY FIRMER, BOUNCIER-LOOKING SKIN
- SOFTENS THE APPEARANCE OF NASOLABIAL FOLDS AND REDUCES THE LOOK OF WRINKLE DEPTH
- CLEARS THE LOOK OF DULL, FATIGUED SKIN
- HELPS SUPPORT SKIN VITALITY FOR STRONGER, MORE RESILIENT-LOOKING SKIN
- SUPPORTS A STRONGER-LOOKING SKIN BARRIER WITH IMPROVED ELASTICITY AND VISIBLE RESILIENCE

How It Works Differently

Ordinary moisturizers sit on the surface. **replenished** is designed to support the foundational processes of skin — how it signals, builds, and protects itself — while helping clear the look of fatigued, senescent cells. It helps support skin in three ways:

Signal

Bioactive peptides and plant stem cells help soften the visible signs of skin fatigue.

Preserve

Antioxidants and ceramides help improve barrier function, elasticity, and visible resilience.

Amplify

Stem-cell support, a hydration network, and a lipid barrier help tired, stressed, and aging skin look visibly smoother, firmer, more radiant, and revitalized.

True renewal isn't applied. It's activated — this is your daily SPA method for skin that looks smoother, firmer, brighter, and more resilient over time.

[HOW TO USE]

After applying your serum, dispense 3–4 pumps of replenished onto your fingertips. Gently smooth over the face and neck using upward motions until fully absorbed. Use more as needed.
